When SoloTinyLeaks originally uploaded these videos to the site they preserved their original filename, at least in the little attachments display in his post, and a lot of them had default names with timestamps in them. This wasn't preserved when you downloaded them, instead the filename was changed to a GUID due to the site's attachment storage process. I didn't think much to try to write down the original filenames since things were so hectic in the moment.

@SoloTinyLeaks can you help with this? We want to know the original filename for this video:

Spoiler: NSFW, still frame from Pxie blowjob video

[View attachment 6709944](#)

Or maybe a mod with global post editing powers can look at the post so see if the attachment still has its original filename. On the site it's
6688488-fbd18a5e24d6e9410e3878d60eaaefcc.mp4

Other interesting geolocation data from some videos?

Spoiler: NSFW: Destiny sucking cock

Also the 50 dollar PayPal thing was a joke, I did try to give destiny an ultimatum before posting the videos though he declined! (nothing monetary)
